- #1372 Chicken Breast Split ALL NATURAL (20lb case)

BEST-TASTING CHICKEN PERIOD.

Have you ever wondered why Springer Mountain Farms Chicken tastes so good???

Quality Housing

Our chickens raised inside environmental houses where they have an unlimited supply of clean water and fresh feed along with plenty of fresh air and room to roam about, allowing them the ability to live a normal life without the threat of predators, harm from the elements, or diseases from other flocks of birds as they would be subjected to if raised outdoors.

All Vegetarian Diet

Springer Mountain Farms recognizes that healthy animals need a safe, wholesome food supply. That's why our chickens are fed a pesticide free, vegetarian diet of corn and soybean without the use of antibiotics, growth stimulants or hormones, or animal by-products.

American Humane Certified

Springer Mountain Farms takes extra steps to ensure the health and welfare of our chickens. American Humane Certified program requires birds to be raised in a low stress environment with proper shelter, comfortable resting areas, sufficient space and the ability to express normal behavior.

Small Birds

Springer Mountain Farms strives to provide our customers with "just the right size" chicken for their consumers. Bigger doesn't always mean better — especially in this case. A smaller bird just tastes better.

The Best-Tasting Birds

Pretty much anything mild and meaty earns the comparison of “tastes like chicken.” But does the pricier organic chicken really taste better than the cheaper conventional? Or do we just like to think that it does? Here, we put the labels to the taste test.

TASTING PANEL

WE SAT A TEAM OF TASTERS DOWN to 12 chicken breasts, a fork, and a notepad. To eliminate labeling biases, we kept the tasting blind, choosing skinless, boneless breasts over the whole bird, because that's what our readers most often cook. Ratings were based on a scale of 1 to 5, and all chicken was poached to 160° for consistency.

RATING 3.4 SPRINGER MT. FARMS <i>Antibiotic-free, cage-free, vegetarian diets</i> Good mellow flavor, meaty yet tender, slices well	RATING 3.3 PUBLIX <i>All-natural</i> Mild chicken flavor, pleasantly meaty texture	RATING 3.1 BELL & EVANS ORGANIC <i>No GMOs, free-range, air-chilled</i> Very tender, thigh-like texture and rich, meaty flavor	RATING 2.9 TARGET MARKET PANTRY <i>All-natural</i> Near vegetal flavor, slightly chalky in chew	RATING 2.9 COLEMAN NATURAL FOODS ORGANIC (COSTCO) Mildly gamey with a bit of earthiness, juicy and succulent	RATING 2.9 JUST BARE GOLD'N PLUMP <i>No antibiotics, vegetarian diet, American Humane Certified</i> Rich texture but slightly dry, mild neutral flavor
RATING 2.9 GOLD'N PLUMP <i>All-natural</i> Robust, slightly sweet flavor but very dry—needs a sauce	RATING 2.9 KIRKLAND FRESH-HARVESTED (COSTCO) Hearty roasted flavor, but dense and doughy texture	RATING 2.6 PERDUE FIT & EASY <i>Vegetarian diet, cage-free</i> Moist but slightly rubbery, grassy flavor	RATING 2.4 BELL & EVANS <i>Antibiotic-free, vegetarian diet, all-natural, air-chilled</i> Brothy flavor but dry texture	RATING 1.7 SANDERSON FARMS <i>100% natural</i> Slightly tacky texture, flavor unmemorable	RATING 1.6 PERDUE HARVESTLAND <i>No antibiotics, vegetarian diet, cage-free</i> Lots of mineral-ity with a tough texture

Bottom line: Not all chicken brands are created equal, and a more virtuous label does not always mean a better-tasting chicken. Avoid basted birds, and for a more robust, meatier flavor, seek out organic chickens. Our best advice? Buy a couple of chickens, taste for yourself, and find a brand that works for your family, your conscience, and your budget. Come dinnertime, the best thing you can do is buy the bird you have confidence in.

What to Expect Next

LEGS CAN'T SUPPORT THE BREASTS in many of today's “efficient” chickens (growing 40% faster than 80 years ago). It's not only stressful on the bird, but it may also affect texture. “Woody breast” (found in 5%-10% of birds) is characterized by hardened muscle tissue—resulting in fibrous, gummy meat that's difficult to chew. Retailers are beginning to demand that farmers go back to slower-growing breeds.

The Great Debate

WHITE MEAT

- White meat is versatile and adaptable, with a mild flavor profile that marries well with marinades, spices, and dipping sauces. To keep white meat from drying out and overcooking, fast and hot is the best way to cook a breast. Great for chicken salad, stir-fries, and sautés.

VS

DARK MEAT

- Dark meat is tender and juicy, great for stews, slow cookers, and grilling. It's more forgiving to cook, cheaper to buy, and more portion-friendly than today's oversized 8-ounce breasts (with just 3 more calories per ounce than white). If you want to really taste chicken, dark meat is the way to go.

SPRINGER

Mountain Farms®

The first chicken to be certified by American Humane Association, SMF chicken leads the industry in animal welfare. One of the only chickens best chefs are proud to list on their menus.
